## Spiritual Intelligence Science

Cosmic Spiritual Science Literality Programming

(A step towards ascension of civilized human awareness)

Consists of the following units:

1-unit 1: Fundamentals of spiritual intelligence.

The first unit consists of the following titles:

- An introduction.
- Name of science.
- Definition of spiritual intelligence.
- Source of spiritual intelligence.
- The purpose of spiritual intelligence.
- Spiritual intelligence science outcome.
- The establisher of spiritual intelligence.
- The subject of spiritual intelligence.
- Spiritual intelligence science is not Psychology.
- Emergent Spiritual Intelligence is different from Emergent intelligence.
- Scientific Fullfillment and sincerity of the title of spiritual intelligence.

## Spiritual intelligence science

**-First unit conclusion of spiritual intelligence.**

### **2. Unit 2: self and divine law act of spiritual intelligence.**

**The second unit consists of the following titles:**

**-An introduction.**

**-The soul: an appearance not a source.**

**-The soul: manages life.**

**-Spiritual Perception.**

**-Perception and Effectiveness.**

**-The relationship between Effectiveness and Perception.**

**-Law of Spiritual Subjectivity within Spiritual Intelligence.**

**-Definition of consciousness.**

**-Elevation of spiritual intelligence.**

**-Divine Law within Spiritual Intelligence.-**

**Conclusion of the Law of Subjectively and The**

## **Spiritual intelligence science**

**Divine Law within Spiritual Intelligence.**

### **3. Unit 3: The Law of Spiritual Awareness within The Spiritual Intelligence.**

**The Third Unit consists of the following titles:**

**-Introduction**

**-Law of Release.**

**-Law of Reaction.**

**-Law of Absorption.**

**- Ascension in The Science of Spiritual Intelligence and Falling into the Science of Spiritual Intelligence Science.**

**-Types of consciousness.**

**- Clarify the distinction between the names of the types of consciousness.**

**-A manifestation of Consciousness and Spiritual Properties.**

## Spiritual intelligence science

**-Unit Three: The Conclusion.**

### **4. Unit 4: Supreme Spiritual Programs.**

- Establishment of Higher Spiritual Programs.**
- The Development of the Higher Spiritual Programs of the Mental Spiritual Intelligence.**

#### **1-unit 1: Fundamentals of spiritual intelligence.**

**The first unit consists of the following titles:**

- An introduction.**
- Name of The Science.**
- Definition of Spiritual Intelligence.**
- Source of Spiritual Intelligence.**
- The Purpose Spiritual Intelligence.**
- Spiritual Intelligence Science outcome.**
- The Establiher of Spiritual Intelligence.**
- The subject of Spiritual Intelligence.**
- Spiritual Intelligence Science not Pyschology.**
- Emergent Spiritual Intelligence is different from Emergent intelligence.**

## Spiritual intelligence science

- Scientific fulfillment and sincerity of the title of spiritual intelligence.
- First unit conclusion of spiritual intelligence.

### Introduction:

Science of spiritual intelligence might be the first time that we hear such a title. It's a step towards ascension of civilized human awareness which starts from knowing spiritual awareness that gives other types of consciousness in the man kind, because we're not used to this kind of science, but in fact it's one of a highly advanced science in the human civilization that creates a a highly courteous civilized human.

Intelligence is the result of mental functions in mind: analysis and synthesis and weighting.

While the spiritual intelligence is the result of spiritual perception abstracts and effectiveness life of the spirit in the life as a whole.

## **Spiritual intelligence science**

### **Name of science:**

**Science of Spiritual Intelligence.**

### **Definition of Spiritual Intelligence:**

**Spiritual intelligence: is the wholeness of laws, secrets and knowledge that is related to awareness and effectiveness which are characteristic of the spirit and how to use them in everyday life.**

**Generally the spiritual intelligence: is the effective movement of effective cognition among them in detail and in aggregate r which constitute subjective spiritual awareness.**

### **-Source of Spiritual Intelligence.**

**The science of spiritual intelligence derives from every scientific and cognitive material that examines human perception and the effectiveness of life, whatever the scientific aspect it represents.**

## Spiritual intelligence science

### **-The Purpose of Spiritual Intelligence.**

Developing Spiritual Intelligence to control mental, emotional commercial intelligence..etc. And all aspects of human intelligence in general, and the promotion of civilization in particular..

### **-Spiritual Intelligence Science Outcome:**

Elevate the spirit (in the essence of life in the soul) towards a deeper realization of the facts and a stronger and more accurate activity in the living life..

### **-The establiher of Spiritual Intelligence:**

No real setter for this kind of science is known before, but a lot of information in this section were found in some books and scientific research, until the founder of the modern metaphysically science Dr Hannibal Yusuf Harb wrote it and collected the requiered informations in a separate special compilation for this science, therefore, Dr. Hannibal is the first blogger of this science.

## Spiritual intelligence science

### **-The subject of spiritual intelligence.**

All the issues of this science are all in the human perception and how the human perception works from an inner sense, its interaction with the spirit, and the effectiveness and mobility of those perceptions in the living life, including the mechanisms of development and development of awareness and effectiveness.

### **Spiritual intelligence Science is not Pyschology:**

It's not right to study spiritual intelligence in psychology and its rules, but it must be studied in the science of the spirit and its rules is the intelligence of its spirit ... It is a science independent of psychology.

Spiritual intelligence has an active and emotional face, so we call it active spiritual intelligence and emergent spiritual intelligence. Spiritual practice involves the development of emergent sensitivity in individuals and their relationships to others.

## **Spiritual intelligence science**

**Conversely, attention to thoughts, feelings and empathy (emergent intelligence) increases our awareness of our spiritual life, Emergent Intelligence helps discovering hidden sources of love and joy amid pressure and disruption of daily life.**

**All psychologists, study the human psyche and determine the subjects of psychology and its issues, and all these subjects and issues are based on the science of spiritual intelligence, spiritual intelligence of the detachments and the results of the spirit in its existence and relations, and to provide and supply.**

**The analysis, composition and weighting of psychologists, although the movement of mind and mental evidence, but it is a result of the results of spiritual intelligence, and everyone should pay attention that every study of spiritual intelligence in psychology and not based on the laws and knowledge of the soul is a psychological study of spiritual intelligence and not a true study of**

## **Spiritual intelligence science**

**spiritual intelligence, the intelligence as long as the glow of the spirit on what it has reached in itself, the investigation of this intelligence can not be only by observing the laws, rules and knowledge of the spirit, and these laws and rules and knowledge are the issues and topics of the science of the soul and the meaning are the scientists of the spirit and not psychologists, And to remove the veil from the eyes of scholars who we find that spiritual intelligence is in the presence of a high spiritual science, but it is possible to examine the special appearance of the worlds of their appearance, the psychological world, and thus increase the burden of responsibility on the psychologists in their studies. Here they must study. Combining the science of spirit and psychology, so they are able to accurately determine the psychological manifestation of spiritual intelligence, which can be called in transgression Psychological intelligence, while I called it when I teach researchers the name of spiritual intelligence in its psychological**

## **Spiritual intelligence science**

appearance.

I mention here that all who studied the science of the Spirit with its true approach by the Spirit and spirit scientists have determined the facts of the psychological science, which does not depart from the science of the soul. Everyone who knows the facts of the science of the soul will know the facts of Psychology, but not all who knows psychology is aware of the spirit and the sciences of the Spirit.

### **Emergent and Spiritual Intelligence is different from Emergent Intelligence:**

Emergent Intelligence may be a mental detachment of analysis, synthesis and weighting that leads to emerge in all its emergent forms, etc.

While Emergent spiritual intelligence is a higher presence, it is a leader, guide, and officer of total emerge in the human being, which controls mental intelligence and other emergent intelligence.

Therefore, there is a difference between the emerge of all that we communicate with and the emergent

## **Spiritual intelligence science**

of the spiritual self-glowing intelligence about the perceptions of the spirit and its orientations.

The same can be said of the most active spiritual intelligence and its relation to the least effective intelligence.

### **Scientific Fullfillment and Sincerity of the Ttitle of Spiritual Intelligence:**

#### **Important notice for scholars:**

When I say that the science of spiritual intelligence is a spiritual science, I ask the scholars not to understand that it is not possible to study the science of spiritual intelligence in its manifestation. Spiritual intelligence has a strong relationship with all sciences, perceptions and actions. It also has its appearance in specialized aspects of man as it appears. In the world of mind and as it appeared in the world of the psyche as it appeared in the world of Psychology and in the world of Physiology of organs where the cell runs .

## **Spiritual intelligence science**

**And it is scientifically unacceptable and totally unacceptable to the true scholars to write under the title of spiritual intelligence what is not the science of the soul and the intelligence of the soul, unless it is meant to speak about the appearance of spiritual intelligence in a world of human worlds. And here we should refer to that, or else it is a scientific betrayal of the science of spiritual intelligence.**

**Because of the specificity of the science of spiritual intelligence and its strong attachment to the world of the soul and its being separated from the soul's detachments, I found that I should write it down through units, which can be combined by man to understand this science. When we received the science of the soul, we received it simply organized and simple. In order to perform the highest spiritual knowledge functions assigned to it, especially Apparitions spiritual intelligence in all the world according to the laws of self-management.**

## **Spiritual intelligence science**

### **-First Unit Conclusion of Spiritual Intelligence:**

**I address the planet for global peace soe human being has the most effective and effective perception, as I have reached a conclusion here, which is the beginning of other units that will benefit people and raise their humanity. And as an author of this science I have to codify it to be a beacon of all those who will come after me to benefit from it in the service of civilized man of true evolution, and perhaps this unit and beyond will be a new brick for the manufacture of a superior technological civilization from the spiritual intelligence of the civilized human.**

**The world today and the planet need to take into account the practical application of spiritual intelligence to take into account ethical spirit in spiritual intelligence building on these foundations that put it in Spiritual intelligence science makes spirit glowing white and wish that this planet will**

## Spiritual intelligence science

**become a white planet with this science and knowledge.**

## Spiritual intelligence science

### **2. Unit 2: The Law of Subjectively and The Law of Holiness in Spiritual Intelligence.**

**The second Unit consists of the following titles:**

- An introduction.**
- The spirit: an appearance not a source.**
- The spirit: manages life.**
- Spiritual Awareness.**
- Perception and Effectiveness.**
- The relationship between Effectiveness and Perception.**
- Law of Spiritual Subjectively within Spiritual Intelligence.**
- Definition of Consciousness.**
- Elevation of Spiritual Intelligence.**
- The Law of Holiness within Spiritual Intelligence.**
- Conclusion of the Law of Subjectively and the Holiness Law within Spiritual Intelligence.**

## **Spiritual intelligence science**

### **Introduction:**

**No one denies that the soul is what manages the object and gives it the attribute of life.**

**And that the departure of the soul from man is called death, and with this death the life of man ceases.**

**It is people who say: The soul is responsible for life in all its manifestations.**

**Some say that the Spirit is the endowment of life**

**All heavenly religions say that Allah is the life-giving of the Spirit, and the Spirit transmits that gift in whatever is related to this Spirit and connects to it, even the human body in which it appears.**

**This difference does not negate the consensus of all, that we recognize life through spiritual emanation, whether the spirit is a source of life or a manifestation of it.**

## Spiritual intelligence science

### **The Spirit: An Appearance not a Source.**

Spirit is the appearance of life on a secret identity and appearance to the secret life of worlds and not the source in reality, but for all below and what emerge from it, the spirit is the pillar of its continuity of there life, and by the spirit Allah provide the all objects

And with the maturity of spirit, objects mature. And when the spirit is nobel the object is more noble.

As the spirit progresses, the object evolves.

As the spirit decline, it affectes the object.

Without that spirit body dies.

By spirit managing body, character's object appears.

### **The Spirit: Manages Life**

The spirit of bad management of all which is related to it, is shown by a poor personality with the characteristics of failure, negligence, degeneration, stupidity, idiot, etc. While the spirit of good

## **Spiritual intelligence science**

**governance for all which is related to it, is showing her good personality attributes of success and excellence and intelligence. Etc.**

**So: The successful man who achieves his objectives as he plans on life strategies, is a smart man. Intelligent management of his life.**

**Here we can note a link between the living spirit full of life derived from Allah, with the intelligence that drives both established and supportive processes, routed deeply, and the maker of the reality of all things related to that spirit.**

**So. there is a clear public appearance to the fact of intelligence that the spirit practice, on everything related to it and everything that feeds on her glow, whether it's a strong or weak intelligence.**

**This public appearances is what we call here the spiritual intelligence.**

**To understand this spiritual intelligence must realize some characteristics of self-spirit:**

## Spiritual intelligence science

Perception and consciousness and spirit in their management of administrative centralization all related and spins on its axis, and emerge from it and therefore we must understand its effectiveness and realities of emotion.

### **Spiritual awareness:**

The spirit, according to the spiritual scientists is the greatest manifestation of the life, given by the Creator of the spirits, and this life is the necessary condition indispensable to the rest of the descriptions of the objects. If we look at the character of sight in the living organism or the hearing, we can not prove it to a dead man, whom is not characterized by life can not To be described with any awareness or effectiveness, but described as contrary to the perception and effectiveness.

Therefore: The connection between the perception and effectiveness in life is a Self-correlation, this is what the mind can understand, As for the people of the Spirit, awareness and effectiveness are one

## **Spiritual intelligence science**

**description of the glow of that spirit, In the science of the spirit, the spirit is animated and conscious, and classify words like similar to what i write here, where I mention spirit and life, glow and perception and effectiveness it is a part of the explanation, but It is not an investigational reality, the existence of the investigational reality, is only what spirit word means and those descriptions are only one presence appears to us when the self-glow happen, the spirit is the essence of a simple individual life, Spirit is the essence of a simple, individual life, and everything we describe in its characteristics, is one of the attributes and considerations through which we look at this spirit,**

**In terms of appearance we say it's life.**

**In terms of science we say it's perception.**

**In terms of ability we say effectiveness..**

**In general, there is no proportion or description unless the condition of life exists.**

**Therefore, in all the beliefs that explain the continuation of the functions and practices of the**

## **Spiritual intelligence science**

**spirit after the death of the object must be clear that the spirit has a life from another form away from the physical body, because the mind sees the demise of life from the body dead and need to recognize the possibility of continuing the life of the soul without that body, The soul captured a color of many colors or of its spiritual intelligence, which is associated with its existence far away From the physical body.**

**Some minds were hidden behind it themselves. Therefor they rejected the life of the abstract spirit and went beyond the spiritual intelligence and replaced it with the mind intelligence, which in fact is not a mind intelligence, but it is only cumulative links between the perceptions and meanings that have been made available to the mind since birth in the physical body, he is only aware of what came from those Interconnections, which he considers to be his own rule intelligence, while pure minds that did not hide from the spirit and the active spiritual perception strongly recognized the judgment of the**

## **Spiritual intelligence science**

**spirit on them and that the spirit is developed above it and that the mind and the physical body is derived from its glow and gave her the ability to continue a life with elements different from the elements Worldly life, These minds were given to the spiritual life after death and accepted to be the spiritual intelligence is the ruling on them and was not fooled by the cumulative accumulation of the links experienced by the mind and known since birth between perceptions and beliefs, and the mind is not aware of that spiritual life and spiritual intelligence ruling him and the director of his functions confused and asked what gives the mind its stability In the performance of its functions If the spiritual intelligence formulates a mental effect called faith and pointed out that this faith is outside the perceptions of the mind can not be interpreted by science, analysis, composition and mental weighting and that this belief is legal in the mind but true in the spirit and confirmed the texts of spiritual intelligence of the mind that if he**

## **Spiritual intelligence science**

**transcends his intelligence The Spirit who governs him will find this faith in Allah In the mind is certainly achieved in the soul, and thus the spiritual intelligence put the mind of faith in the mental field called by the spiritual intelligence (the existence that science doesn't explain) and the mind intelligence and all other forms of intelligence below the spiritual intelligence in the human being, and everything that can not be recognized in this global presence within the box ( I believe in His existence and do not realize it, is an unexplained existence).**

**It is noted that the mind and its detachment which rules over him and over others, is spiritual intelligence , which is higher, and with those active perceptions of the spirit distinguish the people of the spirit from the people of mind and raised the people of the spirit by the spiritual intelligence on all the branches of intelligence that came down from the intelligence of spirit, such as the Mind**

## Spiritual intelligence science

intelligence and Psychological intelligence.

### **Perception and Effectiveness:**

Since the soul is the appearance of life, this life with profound privacy awareness and effective life can only be effective if in itself is the least that can be said about her (It's alive) and there cannot be effective without being recognized even within self level of the soul so the perception and effectiveness are two facts of the life's face. in the essence of the spirit on the one hand effective capacity and science aware once realizing the spirit of its existence and it's alive, this is it's knowledge of itself, and cannot be a realize the existence of herself. without effective this realization.

**So:**

**The essence of the individual spirit is:**

**Is alive with what he is well aware of what he is doing.**

## **Spiritual intelligence science**

**He is aware of what is alive and what is effective..**

**He is active in what is alive and aware..**

**This is the basic law in the spiritual intelligence and spiritual self-Act in the spiritual intelligence**

### **The Relationship between Perception and Effectiveness:**

**That perception and effectiveness are intimately intertwined with each other in what is life, many things and meanings relate among themselves or things diverge among other things but the secret of Life wasn't connecting at reasonable soul glow with efficiency, while all other meanings are connected based on effectiveness and perception.**

**So: efficiency and perception are two properties of the properties of life, and in the connection between efficiency and perception there is a spiritual miracle, and whom can't understand the reality of perception and its association with efficiency, can't understand life, perception without effectiveness**

## **Spiritual intelligence science**

**cannot be life, life is active perception and effectiveness of perception, and don't apply to one without the other.**

**Be aware and do nothing, you have appeared with knowledge, And to do without perception you are here the ability and the ability knowledge to set the flag so its not random and destroys itself.**

**Science needs ability to execute what he knows, and the ability needed the power of science controls to be upright, recognition is by knowledged and effectiveness is by ability. which together constitute light chips of Life.**

**This is with the prespective from the lowest to the highest and see an overlay of life.**

**And with the perspective from top to bottom, life is the core of the science light chips interwoven into the light chips of ability.**

**And with the perspective to the fact, knowledge and ability are the manifestations of life, and without taking on knowledge and ability within its own**

## Spiritual intelligence science

essence, they would not have been detailed.

It is worth understanding here that in real life the effectiveness and perception They can not be understood separately but only by mental sanity within humans, In outside existence, there are two are attributes, The realization of the effectiveness of perception and the effectiveness of perceiving effectiveness are not two processes in the existential reality of life, but rather one process and one equation constituting one flash of life, And the continuation of life, but the continuation of this flash of life, if life is bubbling with its existence, and the continuation of the pulse is the continuity of life, that is, the continued realization of the effectiveness of perception in the core of the effectiveness of the perception of effectiveness.

### **Law of Spiritual Subjectively within Spiritual Intelligence:**

Is the basic law that represents the first thresholds

## **Spiritual intelligence science**

**of spiritual intelligence in the soul**

**Therefore, it is a subjective law of spiritual intelligence. Spiritual intelligence can not be without this law and all that is not described by this efficiency and awareness of life is not spiritual intelligence in anything.**

**So it is a subjective law and from this self-law begins the emergence of spiritual intelligence.**

**The continuation of life is the continuation of its glow with awareness and effectiveness and with each glow we have a new perception and new efficiency added to the previous glow so the flow of life in the appearance of the spirit is a flow of more awareness and effectiveness and thus is a formation of awareness.**

**Consciousness arises from this to continue so that the first glow aware of the issuance of the second glow and thus the first and second effectiveness and thus growing perception and effectiveness continues to flare any continuation of life, thus**

## **Spiritual intelligence science**

**a formation of awareness is formed, and a formation of the active structure appears in a oneness one life, which is the spiritual awareness of this spiritual consciousness continues to glow with the continuation of Spiritual life to become one oneness life, and the largest of its elements are the basic cognitive Flares and effectiveness, full of flares of the living soul with all understood and done from the moment you start, this fundamental conscious awareness spiritual component we call it the spiritual intelligence.**

**Consciousness is the image of spiritual intelligence in one oneness life.**

**It is also the appearance of glare continued effective realization.**

**It is also a manifestation of spiritual life flares**

**Its is also the spiritual essence glow continued appearance of the individual.**

**Hence we understand why consciousness differs**

## **Spiritual intelligence science**

**from one consciousness to another not by what it reaches to realize it and what it does, but why it is aware of it this way.**

**The birth and creation of the soul in its first moments of creation has that priority in building the awareness that results from the continuation of its life and its subsequent perceptions that shape the self-awareness of the spirit that lives its glow as it is first, and then with what it reaches from the insights it brings secondly.**

### **Definition of Consciousness:**

**After speaking about the law of the self of spiritual intelligence, here I must clarify the meaning of consciousness.**

**Awareness definition in Language: Understanding and Integrity of Perception.**

**We are here to understand them only with self-efficacy as we said earlier or else the realization was not effective to carry out the process of cognition.**

## **Spiritual intelligence science**

**Therefore, consciousness is a spiritual characteristic, not psychological or mental, or what so-called mental awareness and mental awareness is a particular aspect of consciousness rather than consciousness as the origin of spiritual consciousness..**

**Therefore: spiritual awareness is consciousness original, and has special appearances, in where it appears, and has types:**

**If it appears in the world of the mind shows us a special kind of spiritual intelligence, we call it in whole mental awareness, as well as its appearance in a special type of spiritual intelligence, psychologist we call it Psychological awareness, appear in the universe with a special type of spiritual intelligence we call it cosmic consciousness, as well as for the self has a special kind of spiritual intelligence calling it Self awareness, and so no matter how many manifestations of multiple proportion it variously, so the names do.**

## **Spiritual intelligence science**

**Here when I say spiritual awareness, we mean all those types without distinction, here we are talking about the spirit world which is above those proportions and its realms.**

**Spiritual awareness: is the totality of perceptions that glows from the spirit.**

**Spiritual intelligence is the movement of those effective perceptions among themselves in detail and in totality.**

### **Elevation Spiritual Intelligence (tangles evolutionist):**

**Spiritual intelligence in case of continued expansion.**

**As spiritual awareness is the totality of perceptions that glows from the spirit, and the spirit in every moment of life is attracting new for every unknown around it, that find itself in a state of awareness and effectiveness in a sea of these imports from the universe and self and other existence and what is**

## **Spiritual intelligence science**

**in the facts of all manifestations; so they are in more active cognitive glow, and therefore, Spiritual intelligence is unstoppable, and therefore continues to expand the capacity of its effectiveness, and cognitive perceptible note of condensation.**

**This assures us that spiritual intelligence while expanding constantly doesn't stop, awareness is in continuous growing, The growth of awareness is an effective cognitive development, so consciousness, is in the case of continuous ascension, because of the continuation of spiritual intelligence intertwined, its the glow of life to the one essence named spirit.**

**Whenever the spirit glow continue, the glow of life is continue, Making the self-intertwining of spiritual intelligence, so we say that consciousness is in ascension**

**This expansion of spiritual intelligence in itself: evolutionary tangle.**

**So: we can say that the elevation of spiritual**

## Spiritual intelligence science

intelligence (tangles evolutionist) is a spiritual feature.

### **The Law of Holiness within Spiritual Intelligence:**

Holiness is essential to the ascension of spiritual intelligence.

The truth of sanctity is important here in spiritual subjects, including spiritual intelligence. Optimal improvement is related to purity and purify, and in general to holiness which is to avoid all impurities that prevent the development purification that we call obscurity.

So:

#### **In first class:**

Spiritual intelligence is influenced by any veil that prevents it from ascending in a certain direction.

#### **Second class:**

If you enter a room for the first time, what spiritual intelligence does is to link the relationships received from the senses. It exercises its effective awareness of the (curtains) and their

## Spiritual intelligence science

characteristics, specifications, condition and measurements, as well as exercising its awareness and effectiveness on tables, tiles, lighting, walls, doors, it creates to every element in the room, an awareness which it perceives, and then connects these perceptions to the whole spiritual consciousness that gives us the last picture of the reality you entered.

This means that the effective realization of the spiritual life of this individual essence has a function that makes it absolute in the exercise of its function. Spiritual life is a spiritual intelligence that does not provide anything under its control to exercise its effective awareness.

**Three elements of spiritual intelligence require three primary effective perceptions of the three elements and then an understanding of the links between these three;** Here we have nine effective perceptions.

A hundred elements develop ten thousand effective awareness in consciousness.

## **Spiritual intelligence science**

**Look at the myriad spiritual intelligence that makes up consciousness in the soul if you know that you are in this life but you are receiving billions of data in one day and imagine the number it will reach from your childhood elderly. It is a huge thing, we are unable to take care of, although it is under the influence of harnessing, so that you bring from this entanglement a sentence that your father told you when you are five years old.**

**Spiritual intelligence is truly a miracle from Allah granted to raise us to be his successors in this existence.**

**This is if nothing is hidden from consciousness and spiritual intelligence is exercised in a state of total purity, ie spiritual sanctity..**

**So: It is important and necessary to exercise spiritual intelligence with all its energies to be a person in a state of spiritual excursion from all the demons of the soul. Here was the function of religions in the ancient world.**

**Since civilized human religion preserves the human**

## **Spiritual intelligence science**

**spirit in a state of purity worthy of accepting the imports of the Holy Divine Transfiguration..**

**As well as fit with him to accept imports of what attracts his senses visible and internal.**

**As well as fit with him to accept the imports of the result of the entanglement of the light of effective perceptions to be all spiritual intelligence.**

### **- Conclusion of the second unit: Conclusion of the Law of Subjectively and The Holiness Law within Spiritual Intelligence:**

**I pray all the time that scholars and researchers of these fields get inspired to these lights of moral values to invest in spiritual intelligence, a bright investment shining the planet by happiness and does not alienate the planet by enslaving .. The human rights of civilization prevail and we build a man who is morally polite.**

**So this create a human being, civilized, bright, peaceful person who understands human importance and awareness.**

## Spiritual intelligence science

**And to realize that every human being on earth is an important human being, and adds an effective human being if he achieves his spiritual awareness, vivid and beneficiary, makes a real peace on earth where all the colors and spectrums of humanity, regardless of their different races and religions.**

## **Spiritual intelligence science**

### **3. Unit 3: The Law of Spiritual Awareness within The Spiritual Intelligence.**

**-Introduction**

**-Law of Release.**

**-Law of Reaction.**

**-Law of Absorption.**

**- Ascension in The Science of Spiritual Intelligence and Falling into the Science of Spiritual Intelligence Science**

**-Types of consciousness.**

**- Clarify the distinction between the names of the types of consciousness.**

**-A manifestation of Consciousness and Spiritual Properties.**

**-Unit Three: The Conclusion.**

## Spiritual intelligence science

### **Introduction to the Definition of Spiritual Awareness:**

I was previously in a Unit Two (**the Law of Subjectively and the Holiness Law within Spiritual Intelligence**) I have said in the definition of consciousness that Awareness definition in Language is: Understanding and Integrity of Perception.

And that we only understand subjectively-efficacy, otherwise it would not have been effective for cognition.

And I explained how consciousness is a spiritual characteristic, not a psychological, or a mental one. And how the so-called psychological awareness and mental awareness is based on a certain aspect of consciousness rather than on the awareness of the origin which is spiritual consciousness. We saw how spiritual consciousness is the consciousness of origin.

And that his special appearances where his appearance and his types:

## **Spiritual intelligence science**

**They appear in the world of the mind shows us a special kind of spiritual intelligence, we call it in a whole mental awareness, as well as its appearance in a special type of spiritual intelligence in psychologist, we call it Psychological awareness, and when it appears in the universe in a special type of spiritual intelligence we call it cosmic consciousness, as well as for the Subjectively it has a special kind of spiritual intelligence. We call it Subjectively Awareness, thus, no matter how many manifestations are multiple ratios so does the names of types multiple.**

**Here, when I say spiritual awareness, so I mean all these species without distinction, we are talkin here in the world of the spirit that is above these proportions and their worlds.**

**Spiritual awareness: is the totality of perceptions that glows from the spirit.**

**So Spiritual intelligence is: Is the movement of those effective perceptions among themselves in detail and in aggregate.**

## Spiritual intelligence science

Here in this unity we need to be aware of special laws of the laws of spiritual intelligence laws of consciousness; which are the laws of the awareness and effectiveness that forms the spiritual consciousness, which spiritual consciousness can not be apparent in its identity from being conscious but only by it:

**-Law of Release.**

**-Law of Reaction.**

**-Law of Absorption.**

Let me begin by explaining some aspects of the law of Release in consciousness:

### **Law of Release:**

The Law of Release is an important law of spiritual intelligence. The release is a characteristic of spiritual intelligence in detail and what constitutes in whole of spiritual intelligence consciousness is, and this release is represented by the limitlessness of the effectiveness of cognition, all imports that

## **Spiritual intelligence science**

**come to the spirit from all outward and internal polarizations are under the influence of the effectiveness of cognition no matter what those imports are, based we have said the release of spiritual intelligence in his consciousness of things no matter what its, and that this release is a law of consciousness because it is concentrated in the composition of the spirit and the infinite flow of life in it, there can be a detailed spiritual intelligence apparent in the appearance of the total consciousness only this ruling release law, and this confirms the fact of cognitive effectiveness, which does not stop working as long as the pulse of life is in the spirit, even if imports are provided to the spirit, is what the spirit can not understand based on what it has reached at a certain level of spiritual intelligence, as we find in children at all stages of their awareness of this presence, all the issues that come to the area of perception of them are exercised by the effectiveness of this realization of its spiritual level higher intelligence and from has**

## **Spiritual intelligence science**

**fall of worlds from lower intelligence such as mental intelligence and psychological intelligence, and innate intelligence and artificial intelligence and natural intelligence... etc.**

**This practice of spiritual intelligence from the child may be narrower than containing cosmic issues, coming to him to understand it, however, the awareness never stop its effectiveness in continuing to link the data and mobilize it to reach the truth in the awareness of this matter.**

**Therefore, these children are already consciously aware of these issues as they continue to live (that is, by continuing to glow with the spirit of conscious life and effective communion) and to continue living and to become aware of those issues that were broader than their spiritual intelligence means that more awareness and effectiveness has been so heightened that he came to contain these issues and became under his understanding.**

## **Spiritual intelligence science**

**>>>> It is in the law of Release that spiritual intelligence does not cease to continue to be aware and effective and expand awareness in all issues, although regardless that at some stage, awareness controls it, so we find that older people may reach in their consciousness to a state of spiritual attrition of the same issues and to the spiritual intelligence, and that is because of the possess of the spiritual intelligence of those issues, and thus feel that these subjects have become very trivial and small in front of the process of consciousness, and starts a spiritually behave from a sense of perfection and reflects on the psychological behavior to translate in the form of a smile and a cynical laugh of the case which was a dilemma for him in the fourth year of his age, which is now nothing at the age of forty years of age.**

**And what was confirmed by the awareness of his spiritual intelligence that it is a catastrophe worth crying long and do the psychological entity of the spiritual entity to cry, you find at the age of forty the**

## Spiritual intelligence science

same elements, a reason for laughter, due to the fact that he his spiritual intelligence has reached it height, in the particular case.

In this law, however, a subjective awareness of self-awareness asserts that the greater the realization of the effectiveness of cognition in the perceivable object, the higher the spiritual intelligence becomes to the level of mature consciousness than before. In the manifestations of his conscious appearance non-stop and this is what is Named in the Science of Spiritual Intelligence Law of Release.

**Important note: Here is a classification of intelligence by destination:**

**The Supreme Spiritual Intelligence:** Is the spiritual intelligence of the spiritual consciousness in which the soul shapes all its spiritual intelligence.

**The Intermediate Spiritual Intelligence:** Is the lower intelligence - from the highest spiritual intelligence - to the other beings of the object to judge the lower

## Spiritual intelligence science

intelligences in accordance with the awareness of higher spiritual intelligence.

**While the lower intelligence:** Is the intelligence descending to the presence of the entire object from the intelligence to the middle of intelligence at a lower level loses the spiritual status to become a special intelligence of the object that came to it. Here is nothing more than a synaptic information link conscious between all perceptions.

**Such as:** Mental and Psychological Intelligence and Emotional Intelligence and Educational Intelligence.

### **Law of Reaction:**

Spiritual intelligence in all levels of conscious appearance is a practitioner of The Law of Reaction as it is formatted by the Law of Release.

And here may perhaps interfere with the mental understanding of some of the discrepancy in the level of intellectual intelligence sends the effectiveness of cognitive manifesting the appearance of psychological intelligence obliges

## **Spiritual intelligence science**

**the world of the mind to search for polarized items from outside the consciousness to form a mental intelligence solve the problem of this emerging contradiction, then you see mental intelligence shows his psychological confusion.**

**He says: How can the effectiveness and emergent in the spiritual intelligence meet?**

**The answer here is accurate and involves understanding the law of emergent in the same spiritual intelligence so that the structure of spiritual intelligence must be completely distinguished between the effectiveness of cognition in the things contained in the consciousness and the emergentness of the effectiveness of the same, new incoming and aware of its own self and then understand all the ramifications of its links to all imports to consciousness, with each emerging new perceptions of all that must be realized from the**

## **Spiritual intelligence science**

**correlations between incoming and incoming imports..**

**And here we note that the incoming entrant has already been made in the spiritual intelligence, he lacks emergent to exercise the effectiveness of his perception of this incoming stream, for example the case of the black room.**

**(The case of the black room is if we put a newborn child in a black room to receive external imports to the ears and sighters and smells, the awareness of this child can not be expanded only to the limits of what was picked up by his spiritual intelligence while in the womb of the mother and thus his consciousness retreats from the consciousness of the rest of children who are outside the black room and who are inquiring Imports and realizing effectively with the rest of perceptions).**

**Also, this law (the Law of Emergent) is reflected in the disabled who were born with disabilities, such as child born blind without eyes, but develops**

## **Spiritual intelligence science**

**consciousness in all aspects of the non-visual even the side of the visual images, but recognizes the messages of spiritual intelligence linked to alternatives to sight, For example, he does not receive a picture of knowledge that he understands with his spiritual intelligence about the red color and therefore can not connect the red color truth with the rest of the imports to his consciousness, thus, despite the Law of Release in consciousness, consciousness is subject to the law of emergent to effectively move its perception of imports.**

**Here, we find that blindness from birth depends on the seven optical imports that support the eye to form visual alternatives in the world of sight, filling the void caused by the loss of the visual sense in spiritual intelligence. Spiritual intelligence continues to expand and expand based on the polarities of alternative visual images of the eye, these are polarizers contact the level and efficiency of polarizing the eye for images, but they are an excellent alternative to these.**

## Spiritual intelligence science

### **Law of Absorption:**

Spiritual intelligence has a law other than the Law of Release and the Law of Emergent, but it is a strange law in reality for those who see it. It is the Law of Absorption, which simply takes everything in the direction of the effectiveness of its realization.

Spiritual intelligence emergentness about any ident shines on it, to make spiritual intelligence aware of it, It takes within this truth all that is described as divine and indescribable.

What I mean here is what is described as divine, everything we say is something, the tree is something, the rose is something, and the Galaxy is something, and the human being is something, and the universe something.

What I mean here by saying is indescribable, such as character of all moral presence and divine presence.

The law of Absorption in spiritual intelligence,

## Spiritual intelligence science

however, exercises the effectiveness of its awareness of all things. This realization also continues even if imports are knowledge of the divine presence, although in every awareness of the existence of consciousness it is aware of its inability to recognize the subjectively divinity, but the law of Absorption is doomed to its effectiveness. We find how some laws, especially Islamic Sharia, has emphasized the futility of reaching the awareness of all its spiritual intelligence to the absorption of the subjectively divinity and the realization of its own soul and the awareness of its identity, the glow of the spirit no matter how intense in the flow of life and no matter how consciously aware of its spiritual intelligence, the substance of the truth, and the ethics of the law of the spirits does not surround the reality of the Creator, and if you know some of its knowledge, It is deficient, and this deficiency is natural, due to spiritual intelligence is at the level of the spirit and the level of life's glow of identity.

## **Spiritual intelligence science**

**Spiritual intelligence, whatever it may be, will never surrender to identity. Spiritual intelligence is about the direction of the essence of the individual called the spirit; the identity is not an individual essence, but is the one who made the essence of the individual, on the eye, which is the secret of the Creator in the creature.**

**Therefore, spiritual intelligence is unable to exercise the effectiveness of its perception of identity, but maintains the Law of Absorption, which does not stop the continuation of the effectiveness of perception, hence, as a natural consequence of this inertia, which is unable to reach what is above it, there is in it a spiritual intelligence that does not touch the truth. Spiritual intelligence has within the Law of Absorption which has to reach the reality of everything without it, and remains confused at a higher level than it is, and because the specificity of the release, which is called by the Law of Release, remains effective, and if this effectiveness of the partnership leads to**

## **Spiritual intelligence science**

**illusions at the level that is higher because spiritual intelligence is at the expense of imports, his consciousness is always manifested in his spiritual and spiritual effectiveness, while the divine presence and the higher identity of the essence of the spirit of the individual does not give that intelligence all the flakes of the light, but reflected in what is the expansion of the spirit only, and thus, the Law of Absorption loses its control over identity for its inability to take advantage of it.**

**Really really, the inability to recognize identity is in the spiritual intelligence, realization.**

**Raising within The Science of Spiritual Intelligence and falling within The Science of Spiritual Intelligence:**

**Simply put: The Law of Absorption covers everything, giving upto the life-flare of the spirit, superior precise and effective and high awareness of ascension to the spiritual intelligence, while the inability to recognize what is above it put him in**

## **Spiritual intelligence science**

**a conscious sense of its inability to surround all identity chips.**

**And about this law in the introspection and the integrity of under it, and its failure to arrive to realize who is higher than it, arose the existence of lower spiritual intelligence lower, those entities that characterized the intelligence of the spirit that produced the devilish spiritual intelligence and evil spiritual intelligence and spiritual intelligence governing the movement of evils in the world.**

**Yes, this is where negative consciousness originated.**

**Yes.. From here the corrupt doctrines arose.**

**Yes.. from here arose the immoral values.**

**The immoral values, corrupt beliefs, corrupt consciousness are practices in reality and works to emulate the pure truth that can only be a positive consciousness and a high ethical values and valid beliefs.**

## **Spiritual intelligence science**

**From these simulations in spiritual intelligence, and from these conflicts under the dome of consciousness, conscious existence was divided into a higher world and a lower world.**

**From this simulation in spiritual intelligence of these conflicts under the dome of the conscious existence divided consciousness to the world and underworld.**

**A higher praised immortal happy and lightened world.. and a lower outcast indignant miserable and unlighted world.**

**Those who knew these facts were marginalized in the upper world and were integrated into its upper expanding spiritual intelligence.**

**And by blocking his spiritual intelligence from the truth of the Law of Absorption here, he has deflected into the lower world and has been embedded in his expanding spiritual intelligence.**

**The reader may say to these words that he prefers the spiritual intelligence that is expanding to the**

## **Spiritual intelligence science**

**upward side, and this is true, and we thank him, but the reality is that there are those who do not see this trend with his spiritual intelligence expanding downwards..**

**As the real existence of the angels there is the real existence of demons.**

**Although what is sure in the world of facts is the superiority of the realistic angelic presence, thou the diabolical realistic presence never ceases to be disaffected by its expanding downwards spiritual intelligence despite its awareness of its impotence in the face of the upward expanding spiritual intelligence..**

**And this continuation of the decline is due to the Law of Absorption in spiritual intelligence.**

### **Types of consciousness:**

**Awareness has manifestations and types that are determined by the spiritual intelligence and its addenda to what it moves in with the effectiveness**

## **Spiritual intelligence science**

**of its perception.**

**The effectiveness of perceiving imports into the spirit with the data of the world of sport simply allows us to call it the effectiveness of sports perception, thus, spiritual intelligence as a whole is a spiritual intelligence of the sport, and we can simply call it spiritual intelligence of the sport. If we look at the overall picture of sports spiritual intelligence, we find a high quality kind of consciousness we call the spiritual awareness of the sport.**

**Thus we can see the rest of the kinds of spiritual intelligence and classify the rest of the kinds of consciousness based on the types of spiritual intelligence.**

**What is attributed to the effectiveness of perception in the mental world can be called Mental Spiritual Intelligence which is a kind of consciousness type we call the spiritual consciousness of the mind.**

**Here we can also attribute to the effectiveness of**

## **Spiritual intelligence science**

**perception in the psychic world what we call spiritual intelligence of the psychic world, a kind of consciousness that we call Spiritual Awareness of the Soul.**

**Thus we can discourage those species by their relation to those worlds so that we can speak of a particular type in the spiritual intelligence called the spiritual intelligence of the heart and a particular type of spiritual consciousness called the spiritual consciousness of the heart.**

**Thus we have:**

**The spiritual intelligence of the mind and the spiritual awareness of the mind**

**The spiritual intelligence of the soul and the spiritual awareness of the soul**

**Spiritual intelligence of the heart and spiritual awareness of the heart**

**Spiritual intelligence of education and spiritual awareness of education**

## **Spiritual intelligence science**

### **Spiritual intelligence of sport and spiritual awareness of sport**

Here we must distinguish between these types of intelligence, between what is spiritual and what is not spiritual, all that is specific to the awareness of the origin is a spiritual intelligence and is the intelligence of all the origin.

And all that is non-spiritual is one of the types of intelligence that are limited to a specific world such as mental intelligence, psychological intelligence, heart intelligence, educational intelligence, sports intelligence ... etc.

And what has images in the consciousness are the types we call mental awareness and psychological awareness and awareness of the heart and educational awareness and awareness of sports .... etc..

My follower can understand in these previous lines that we have distinguished between spiritual mental intelligence and mental intelligence, and we have

## **Spiritual intelligence science**

**distinguished between the spiritual awareness of the mind and mental awareness.**

**And also we can distinguish other types was a distinction between psychological and spiritual intelligence smart psychiatrist and spiritual awareness of self and consciousness.**

**We can also distinguish the rest of the types as if we distinguish between spiritual intelligence, psychological intelligence, psychological awareness of the soul and psychological awareness.**

**And also we should distinguish between the spiritual intelligence of education and educational intelligence and the spiritual awareness of education and educational awareness.**

**We must also distinguish between the spiritual intelligence of the heart and the intelligence of the heart, and between the spiritual awareness of the heart and the awareness of the heart.**

## Spiritual intelligence science

Now that we have learned the need to distinguish between these labels let me write to you here what distinguishes those labels from each other:

**Mental Spiritual Intelligence** is an effective spiritual realization of the mind in the spirit world.

While **Mental Intelligence** is an effective realization of mind in the world of mind exclusively and not beyond the realm of the soul, ruling of all perceptions under the power of reason.

**Spiritual Awareness** is also the sum total of effective, mind-driven perceptions that are recognized in the spirit world.

**Mental Consciousness** is governed by **The Mental Spiritual Consciousness** above it, which is the ruler of all perceptions under the authority of its consciousness.

**The Spiritual Intelligence of the Soul** is an effective spiritual realization of the soul in the spirit world.

While **Psychological Intelligence** is an effective realization of the soul in the world of the psyche

## Spiritual intelligence science

exclusively and not beyond the realm of the spirit, it is governed by **Psychological Spiritual Intelligence** above it, a ruler of all perceptions under the authority of the soul.

**Psychological Spiritual Awareness** is also the sum of effective, self-conscious perceptions that are recognized in the spirit world.

While **psychological Awareness** is the sum of effective, self-conscious perceptions that are recognized exclusively in the world of the psyche and not beyond the realm of the soul.

**Psychological Awareness** is governed by the **psychological Spiritual Awareness** above it, which is the ruler of all perceptions under the authority of its consciousness.

**Spiritual Educational Intelligence** is an effective spiritual realization of education in the spirit world.

While **Educational Intelligence** is an effective realization of education in the world of education exclusively and does not exceed the world of the

## Spiritual intelligence science

spirit, because it is governed by Educational Spiritual Intelligence above it, the ruler of all perceptions under the authority of education.

**Spiritual Educational Awareness** is also the sum of the effective perceptions of education that are recognized in the spiritual world.

While **Educational Awareness** is the whole of effective perceptions specific to education, which are recognized in the world of education exclusively and do not exceed the spirit world.

**Educational Awareness** is governed by the **Educational Spiritual Consciousness** above which is the ruler of all perceptions under the authority of consciousness.

**Spiritual Cardiac Intelligence** is an effective spiritual realization of the heart in the spirit world.

While **Cardiac Intelligence** is an effective realization of the heart in the world of the heart exclusively and not beyond the realm of the soul, it is governed by

## Spiritual intelligence science

the Spiritual Intelligence of the heart above it, which is the ruler of all perceptions under the authority of the heart.

As well as **Spiritual Cardiac Awareness**, is the whole heart-specific and effective perceptions that are recognized in the spirit world.

While **Cardiac Awareness** is the whole of effective heart-specific perceptions that are recognized in the world of the heart exclusively and not beyond the realm of the spirit.

**Cardiac Consciousness** is governed by the **Spiritual Cardiac Awareness** above it, which is the ruler of all perceptions under the authority of its consciousness.

**Sports Spiritual Intelligence** is an effective spiritual realization of sport in the spirit world.

While **Sports Intelligence** is an effective perception of sport in the world of sport exclusively and not beyond the realm of the soul, it is doomed to

## Spiritual intelligence science

spiritual intelligence above it, which is the ruler of all perceptions under the authority of sport.

**Sports Spiritual Awareness** is also the sum of effective sports-specific perceptions that are recognized in the spirit world.

While **Sports Awareness** is the sum of effective sports-specific perceptions that are recognized in the world of sport exclusively and not beyond the realm of the soul.

**Sports Consciousness** is governed by the **Sports Spiritual Consciousness** above him, which is the ruler of all perceptions under the authority of its consciousness.

**Clarify the differentiation between types of consciousness:**

**My brother in Almighty Allah**, to clarify the differentiation of these names from each other I will simplify the words in some of them a nice simplification and you measure the other

## **Spiritual intelligence science**

**distinctions, mental spiritual intelligence in the world of the soul is leading mental intelligence in the world of mind by allocating effective perceptions of mental intelligence its movement in the structure of existence, mental intelligence deals with organizing are its inevitable constitutions by everything, such as the law of analysis, the law of the weighting and structure law, if we asked who put these laws governing mental intelligence we find it mental spiritual intelligence outcomes where it created a special spiritually conscious by mind, which adjusts its mental intelligence to these three laws.**

**Thus we find that these three laws (analysis, synthesis, and weighting) are the sons of the spiritual awareness of the mind formed by mental spiritual intelligence, and here it is passive and submerged under the power of mental spiritual intelligence by the appearance of the spiritual consciousness of the mind.**

**While the same three laws (analysis, synthesis, and**

## **Spiritual intelligence science**

**weighting) are fathers in the mental consciousness resulting from mental intelligence, they are effective here and they are applied to all the effective perceptions of mental intelligence in its manifestation which is the mental consciousness.**

**In the world of the soul, there is an effective awareness of the existence of analysis, structure, weighting, the nature of these facts and their judgment, while in the world of mind their functions and effectiveness appear to those under their authority.**

**For this reason, these three laws (analysis, synthesis, and weighting) were considered the supreme spiritual programs when they developed the science of higher spiritual programs, a subconscious science of spiritual intelligence, where it examines the specificity of the supreme spiritual programs governing everything which is below spiritual awareness. perhaps the analysis, synthesis and weighting are among the most prominent of these high spiritual programs in the**

## **Spiritual intelligence science**

**management of mental intelligence.**

**What we have said, is in the diversity of spiritual consciousness and the diversity of spiritual intelligence.**

**The manifestations of spiritual awareness and spiritual intelligence formed for this consciousness are the emergence of this spiritual intelligence in certain spiritual properties.**

**This leads us to an existential reality called the characteristics of the spirit.**

### **-A Manifestation of Awareness and Spiritual Characteristics:**

**If we know that the spirit has very important characteristics which are given by its perfection and the complementarity of the functions of its essence and the perfection of its effect resulting from its glow, we must witness the movement of spiritual intelligence through those characteristics. And as a result we witness the supreme truth,**

## **Spiritual intelligence science**

**a Manifestation of Spiritual Awareness within it to dedicate its spiritual intelligence.**

**Because the mothers of those spiritual characteristics in the sciences of the soul are in cognitive order:**

- 1. The Characteristic of Life.**
- 2. The Characteristic of Science.**
- 3. The Characteristic of Will.**
- 4. The Characteristic of Ability.**
- 5. The Characteristic of Hearing.**
- 6. The Characteristic of Sight.**
- 7. The Characteristic of Speech.**

**Thus, detailed spiritual intelligence is shown, focusing on these seven characteristics which are the characteristics of the incandescent spirit:**

- 1 - Spiritual Intelligence of Life.**
- 2 - Spiritual Intelligence of Science.**
- 3 - Spiritual Intelligence of Will.**

## **Spiritual intelligence science**

**4 - Spiritual Intelligence of Ability.**

**5 - Spiritual Intelligence of Hearing.**

**6 - Spiritual Intelligence of Vision.**

**7 - Spiritual Intelligence of Speech.**

**These intelligences appeared in a general manifestation embodied in the manifestations of spiritual awareness, therefor the following kind of spiritual awareness appeared:**

**1 - Spiritual Awareness of Life.**

**2 - Spiritual Scientific Awareness.**

**3- Spiritual Awareness of Will.**

**4 - Spiritual Awareness of Ability.**

**5 - Spiritual Awareness of Hearing.**

**6- Spiritual Awareness of Vision.**

**7 - Spiritual Awareness of Speech.**

**Each of these manifestations has higher spiritual**

## **Spiritual intelligence science**

programs that give each consciousness its own personality in any world. However, these supreme spiritual programs are one of the mechanisms practiced by the sacrament of the spirit in its glow. in more detail, it is one of the mechanisms practiced by the mystery of the Spirit in its spiritual intelligence , And in deeper detail is a mechanism of the mechanisms practiced by the sacrament of the spirit in the realization of its effective perception.

Effective perceptions are not aware of absurdity and randomness, and this is what I wrote in a special letter I call the Laws of Effective Perception in the Science of Spiritual Intelligence.

### **Unit Three: The Conclusion**

My Brother in Almighty Allah, In the end of this unit, which shared its knowledge between the science of the spirit and the science of intelligence, I produced a science of the spiritual intelligence and explained the appearance of this spiritual intelligence and

## **Spiritual intelligence science**

**how it appears in consciousness. I had to separate its manifestations according to the spiritual characteristics. These units are to codify everything related to spiritual consciousness in its basic stages and here it is and here is the meaning that has happened and knows the spiritual consciousness in a simple general formula the world today, with what is full of its concerns, can not do more than this depth which we have spoken, spiritual awareness is deeper than can be understood by the concept that our planet has reached today, Spiritual Intelligence is far superior to what can be achieved by the burdened, blocked souls that have been crowded on this planet, and whose only concern is to complete the payment of the living bills that have become much more important today, while all these souls must live a special spiritual intelligence aware that their ascendance saves them from the concerns and burdens of these bills and liberates them from fanaticism and fa they are in the runways of humanity and urbanization.**

## Spiritual intelligence science

**I pray for Allah to make this world a more spiritual elevated and intelligent, giving up intolerance and promoting tolerance and acceptance of human diversity in all its civilized forms to create a noble peace.**

## **Spiritual intelligence science**

### **4-unit 4: Supreme Spiritual Programs**

- Establishment of Supreme Spiritual Programs**
- Development of Supreme Spiritual Programs for Intellectual Spiritual Intelligence**

#### **The Supreme Spiritual Programs configuration:**

With the beginning of effective cognition with the beginning of life and after the continuation of this effective realization comes the cumulative quantum of perceptions and perceived information.

There is no doubt that this effective cognitive accumulation is in a state of continuous increase, and that the specificity of perception in the spirit is subject to the sequencing of cognition; in other words, there are perceptions that have existed before perception. Thus, in the subjectively spiritual intelligence which forms the spiritual consciousness is the so-called cognitive order; it is that all perceptions of consciousness are arranged

## **Spiritual intelligence science**

**according to the primacy of their existence, What it is realized first comes first in the consciousness, and therefore we are in front of intellectually arranged intellects rather than randomly.**

**There is no doubt that life as seen in the whole universe entails evolution, and the embryos begin their life; the building of the consciousness cell while the stages of sanity things are too late for the stage of building cell consciousness.**

**In all the alives, it is observed that the older, the more active cognitive characteristics are present, so we fully understand that effective cognition is not only sequential and consequential to the former and subsequent system, but also organizes itself according to his cognitions.**

**And perceptions of insects do not exceed the characteristics of the spirit, and perceptions of the the four-legged do not exceed the characteristics of the spirit as well as the objects of the logical and sensible, their perceptions do not exceed their**

## **Spiritual intelligence science**

**spiritual characteristics, so we said that these perceptions are first sequenced and involve and intervene in a system imposed by the characteristics of the spirit on its spiritual life arises what we call the Supreme Spiritual Program which is an information collection aware that they come together to achieve an active perception.**

**For example, the first recognition of the essence of the whiteness and consciousness and the fact that every white is called the Supreme Spiritual Program in the highest understanding of the white in each white, and also arises in the case of the essence of vegetation as well as in the essence of blackness and the essence of Cubism and the essence of planetary and so that the core of all the environment surrounding the organism effective detection.**

**In the Supreme Spiritual Program within the perception of the essence of the whiteness, the spiritual consciousness of the living organism can recognize all the white in the cosmic existence.**

## **Spiritual intelligence science**

**Spiritual awareness here in the first stage constitutes its awareness of the essence of whiteness and in the following stages it has a Spiritual Program.**

**So: there has been a development here at the level of effective cognition in the structure of effective cognition where the soul first defines the essence of whiteness in each white, and then the knowledge comes to form the spiritual program which governs the spiritual consciousness over that all white in existence, is within the essence of whiteness, so in the essence of greenish and yellowish essence and in blackness essence, and every color essence.**

**These spiritual programs are called supreme because they are the highest level of active perception in the spiritual entity in terms of its definitional governance over all its material in existence. It is one of the other percentages that can be called the first spiritual programs because they are the opening of the living cognition in the living organism. Creation, for all life created by**

## **Spiritual intelligence science**

**Almighty Allah, are the first of its virtues, which are based on pure cognitive awareness pureness.**

**It should be noted here that these examples that I mention under this heading are not only what constitutes the instinct, but the word instinct is a very broad word in spiritual intelligence, means thousands and perhaps millions of countless of the first spiritual programs, which are the first form of the personality of the living spirit.**

**The movement of the turtle when hatched from the eggs under the sand on the beach and towards the water exclusively at the first moment of hatching a program organized in the spirit of the turtle and the guide and leader of each entity, and enter into this section all the organizational programs to work the functions of the organism from the moment of creation such as the sequence of lungs between the inspiration and exhalation, the pulse of the heart at an amazing pace and rhythm, the programs of supervision of the work of the glands and the miraculous system which is the greatest system of**

## **Spiritual intelligence science**

**nutrition that reaches the cells from the most accurate capillaries in the organism to the management of nerve to the psychological awareness programs of the external environment and the processes of building relations of different degrees of consciousness with the surrounding environment entities and all these programs are called First Supreme Spiritual Programs (Primitiveness), there are also the supreme spiritual programs (Primitiveness), which are adopted by these supreme spiritual programs, which are more spiritual programs that are connected to perception and effectiveness. they are not only the result of a single conscious individual perception but also of being consciously aware of one active cognitive consciousness or spiritual program a full top is shaped by its conscious outcome, there is one cognition with a spiritual program, and there is a primal primitiveness supreme spiritual program with a higher primal primitiveness supreme program, such as the realization of the orange.**

## Spiritual intelligence science

a primal primitiveness supreme spiritual program that recognizes the orange color is associated with the realization of another primal primitiveness supreme spiritual program, the result is aware of one piece of information is the color orange acid is formed from these perceptions actors, supreme spiritual program, realizes all perceptions in the orange and recognize them in all the oranges in the world, with onea spiritual program that combines the partial program, which is the orange and the partial program, which is acidic and the partial program that is Spherical and the partial program, which is guessing and the partial program, which is pulposus and the partial program, which is the cortical and partial program that is fruit .. to the last realize in the spirit of those fruit named in the orange.

All that I have mentioned here is important to us humans, but most important are those spiritual programs that shape our effective behavior. This behavior, which is based on supreme spiritual laws,

## **Spiritual intelligence science**

**has been created by the vitality of the living spirit through its active realization of values, feelings, beliefs, customs, traditions, culture, and the primitiveness perceptions and everything that comes to the spirit of its apparent and internal strengths.**

**In these supreme spiritual programs, work is on the development, management and organization of spiritual intelligence is based on the human will to form a superior spiritual consciousness that gives man the fullest appearance among his peers.**

**We find that governance in spiritual life is linked to the force of spiritual intelligence that forms the general spiritual consciousness of the organism.**

**Here is a pivotal point in working on the development of spiritual intelligence and the formulation of optimal spiritual consciousness.**

**Supreme Spiritual Programs are responsible for the manufacture of the object according to the spiritual intelligence which created the general spiritual consciousness of the object.**

## **Spiritual intelligence science**

**Example: General spiritual awareness of being aware of the need for prudence and outside incoming to the brain, creating to the mind the appropriate supreme spiritual programs which direct, control and rule work of the mind, which create Supreme Spiritual Program, called a program of mental analysis program, and also makes another program called mental synthesis program and make a third based program on the results of the analytical and structural programs to give them as a result of weighting and calls the mental outweigh program.**

**These three programs lead the so-called mind and whenever the human will moves to move the mind to something from its surroundings to reason it, it directs these three spiritual programs (analysis, synthesis and weighting). These active perceptions practice these three programs, so we reach to a mental sum, which we call Mental Intelligence, which is the movement of these three programs at the level of the mind and below. These three**

## **Spiritual intelligence science**

programs are above the level of the mind. We call it the spiritual mental intelligence which constitutes what we call spiritual mental consciousness.

It is worth mentioning here that the more we develop the three supreme spiritual programs (analysis, synthesis, and weighting), the greater the spiritual intelligence of the mind and thus the maturity of mental spiritual consciousness, which positively affects the movement of the mind in the formulation of mental intelligence moving in the recognition of things below it.

### **- Development of Supreme Spiritual Programs for Intellectual Spiritual Intelligence:**

— For example, the program of analysis: All the rules received by the mind by learning mathematics in the analysis of natural and fractional numbers and the like, it comes in the development of mental intelligence and does not develop the spiritual program of analysis, because they are subject to

## **Spiritual intelligence science**

**the origin of the Supreme Spiritual program that is an analysis program, called the Supreme Spiritual Program (analysis) is the one who handles mathematical data analysis at the level of the mind are not fit to become part of the spiritual program it is a mental substance and not a spiritual substance which they are aware of data especially mental intelligence and its not a life effective perception material.**

**Thus, the development of the supreme spiritual program called the analysis program, which leads the mind and mental intelligence processes in the analysis of everything around it, is the supreme spiritual consciousness, not the mental consciousness. In other words, the development of the supreme spiritual programs is done only by spiritual mechanisms that control and dominate the spiritual intelligence and can't be developed by mental informations which are build by mental intelligence.**

## **Spiritual intelligence science**

**In my study of this truth, I found that the supreme spiritual programs in the world of the spirit are only applied to everything that is truly spiritual, and in our world it is the Divine Names, Verses and Texts of Spiritual Control.**

**When we look closely at this, we find a common factor among all these spiritual authorities, the world of letters, from which all the texts, including the structures and orders of the Divine Names in all different religions.**

**If we can say that the letters are the simplest ruler among the rulers that govern the world of spiritual intelligence, the characters are the basic arguments that form the ruling spiritual programs, and are the formers of private and public spiritual consciousness.**

**In the precise experience that did not lag behind, we found that those who mention certain Divine Names do activate in their spiritual life the supreme spiritual programs, whatever they may be.**

## **Spiritual intelligence science**

**My first experience in the first decade of the first century was for primary school students where my son was studying, I taught students to mention names for the development of the supreme spiritual program of perception. The results in the second half of the year were amazing, the students' progress was 90% In the first semester which prompted me to open to launch a new experiment in the following year since the beginning of the year with all parents around me who have school children from neighbors to relatives to acquaintances to friends; the results were amazing in increasing mental perceptions of mental intelligence and the development of supreme spiritual programs (analysis, synthesis and weighting) which reflected the students' superiority and opened more experiences on the names of awareness, understanding and learning later.**

**So I began to hold training courses in which I studied the supreme spiritual programs of learning and understanding to develop the spiritual**

## **Spiritual intelligence science**

**intelligence of the school students who benefited from this science. I did not teach them the principles and rules of spiritual intelligence or anything of spiritual intelligence but I only taught them the supreme spiritual programs and explained their work manuals with a presentation of the results of the predecessors in this section, and this is only due to their age and levels of education, and I call them the courses of the science of supreme spiritual programs until these courses are required at the beginning of each academic year in some institutes that have noticed these supreme spiritual programs.**

**Here, the second stage was the transfer of these spiritual techniques to the stage of adult education and the development of different types of intelligences in man. Thus, these spiritual programs were tested and the results were monitored and organized in training courses for students.**

**Thus the birth of a new science in this world is**

## Spiritual intelligence science

a sub-science of the science of spiritual intelligence  
called (the science of supreme spiritual programs).

The end

Hanibal Yousef Harb

Translated By Dr. Abdullah Kashkoush

Science of spiritual intelligence might be the first time that we hear such a title. It's a step towards ascension of civilized human awareness which starts from knowing spiritual awareness that gives other types of consciousness in the man kind, because we're not used to this kind of science, but in fact it's one of a highly advanced science in the human civilization that creates a highly courteous civilized human

No real setter for this kind of science is known before, but a lot of information in this section were found in some books and scientific research, until the founder of the modern metaphysically science Dr Hannibal Yusuf Harb wrote it and collected the requiered informations

## Spiritual intelligence science
